OVERVIEW OF THE INSTITUTION	RATING RATIONALE

Suraj Cotton Mills Limited was established as a public limited company in December 1984. The company is involved in manufacturing of yarn and griege fabric through its integrated spinning and weaving facilities.

Profile of the Chairman

Mr. Khalid Bashir has over 42 years of association with textile and sugar industry, as well as with financial institutions. He has led the Board of Directors of Crescent Group and held directorships at other companies. He also serves as a member of APTMA electing committee.

Profile of the CEO

Mr. Nadeem Maqbool has 25 years of experience in textile industry. Apart being director at various companies, he also acted as the Chairman of APTMA (Southern Region).

Financial Snapshot

Total Equity: end-FY19: Rs. 6.1b; end-FY18: Rs. 5.6b; end-FY17: Rs. 5.3b

Assets: end-FY19: Rs 11.8b; end-FY18: Rs. 11.2b; end-FY17: Rs. 9.6b

Profit After Tax: FY19: Rs. 858.6m; FY18: Rs. 565.5m; FY17: Rs., 505.8m

Suraj Cotton Mills Limited (SCML) consists of four operating units of integrated spinning and weaving facilities at different locations. Majority of the shareholding is held by its associated company and sponsoring family. The ratings assigned reflect positive trajectory of sales, supported by augmentation in margins emanating from operational efficiencies and economies of scale. The ratings also incorporate sound liquidity profile, adequate coverages and comfortable leverage indicators. However, the ratings remained constrained by vulnerability of spinning sector to raw material prices and any adverse changes in regulatory duties. Further, corporate governance framework has room for improvement.

Improvement in production on the back of capacity expansion: capacity utilization has remained high over the years: SCML manufactures yarn ranging from 40s count to 120s count. The yarn is produced both from local and imported cotton, though the import of raw material has declined during FY19 on account of local currency devaluation. The proportion of local and imported cotton was reported at 72:28 (FY18: 23:77; FY17: 65:35). Being an integrated facility, yarn required for the production of greige fabric is entirely met through in-house production. The company has a moderate concentration risk as top 10 customers contributed 31% (FY18: 29%; FY17: 33%) to total sales during FY19. With the addition of 30,000 spindles at Unit-IV during FY18, the company's total installed spindles increased to 122,304, leading to a total production capacity of yarn to 53,226,641 Kgs/annum by the end-FY19. Weaving units at Shahkot have 204 airjet looms installed, with a total production capacity of greige at 100,639,852 Sqm at the end-FY19. Capacity utilization has remained high at 97% (FY18: 94%; FY17: 92%) over the years.

Profitability underpinned by higher sales and increasing margins: During FY19, the company reported net sales of Rs. 14.0b (FY18: Rs. 11.1b; FY17: Rs. 8.3b), driven largely by notable increase in average selling prices of yarn to Rs. 208.7/pound (FY18: Rs. 174.8/pound; FY17: Rs. 161.5/pound) and greige fabric to Rs. 160.9/meter (FY18: Rs. 137.8/meter; FY17: Rs. 132.0/meter) along with increase in volumetric sales. Over the period of last three years, company's net sales have grown at a CAGR of 21.7%. As a result of higher average selling prices of all products and rationalization of overall production cost, gross margins increased to 11.4% (FY18: 8.2%; FY17: 6.4%) during FY19. In the total sales mix, proportion of local sales increased marginally to 92% (FY18: 91.6%) and waste sales increased to 5.3% (FY18: 4.4%) while export sales decreased to 2.7% (FY: 4%). During 1QFY20, the company recorded net sales of Rs. 3.4b, while gross margins were recorded higher at 13.2% on account of increase in yarn prices.

Coronavirus to result in uncertainty in textile sector dynamics: The revision in rating outlook reflects prevailing uncertainty in textile sector dynamics due to coronavirus outbreak, prolonged lockdown, overall contraction in demand, sharp fall in cotton prices and challenging economic environment. It is expected that the entire value chain of the textile industry will be impacted by these developments. Status of the assigned rating is therefore uncertain as an event of deviation from expected trend has occurred; additional information will be necessary to take any further rating action, warranting a 'Rating Watch-Developing' status. Given the low leveraged capital structure, it is expected that ratings will remain stable post recovery of the ongoing situation; nevertheless, as scenario is evolving rapidly, VIS will closely monitor and will accordingly take action to resolve the outlook status.

ISSUE/ISSUER RATING SCALE & DEFINITIONS Appendix II

VIS Credit Rating Company Limited

RATING SCALE & DEFINITIONS: ISSUES / ISSUERS

Medium to Long-Term

AAA
Highest credit quality; the risk factors are negligible, being only slightly more than for risk-free Government of Pakistan's debt.

AA+, AA, AA-
High credit quality; Protection factors are strong. Risk is modest but may vary slightly from time to time because of economic conditions.

A+, A, A-
Good credit quality; Protection factors are adequate. Risk factors may vary with possible changes in the economy.

BBB+, BBB, BBB-
Adequate credit quality; Protection factors are reasonable and sufficient. Risk factors are considered variable if changes occur in the economy.

BB+, BB, BB-
Obligations deemed likely to be met. Protection factors are capable of weakening if changes occur in the economy. Overall quality may move up or down frequently within this category.

B+, B, B-
Obligations deemed less likely to be met. Protection factors are capable of fluctuating widely if changes occur in the economy. Overall quality may move up or down frequently within this category or into higher or lower rating grade.

CCC
Considerable uncertainty exists towards meeting the obligations. Protection factors are scarce and risk may be substantial.

CC
A high default risk

C
A very high default risk

D
Defaulted obligations

Short-Term

A-1+
Highest certainty of timely payment; Short-term liquidity, including internal operating factors and /or access to alternative sources of funds, is outstanding and safety is just below risk free Government of Pakistan's short-term obligations.

A-1
High certainty of timely payment; Liquidity factors are excellent and supported by good fundamental protection factors. Risk factors are minor.

A-2
Good certainty of timely payment. Liquidity factors and company fundamentals are sound. Access to capital markets is good. Risk factors are small.

A-3
Satisfactory liquidity and other protection factors qualify entities / issues as to investment grade. Risk factors are larger and subject to more variation. Nevertheless, timely payment is expected.

B
Speculative investment characteristics; Liquidity may not be sufficient to ensure timely payment of obligations.

C
Capacity for timely payment of obligations is doubtful.

Rating Watch: VIS places entities and issues on 'Rating Watch' when it deems that there are conditions present that necessitate re-evaluation of the assigned rating(s). Refer to our 'Criteria for Rating Watch' for details. www.vis.com.pk/images/criteria_watch.pdf

Rating Outlooks: The three outlooks 'Positive', 'Stable' and 'Negative' qualify the potential direction of the assigned rating(s). An outlook is not necessarily a precursor of a rating change. Refer to our 'Criteria for Rating Outlook' for details.www.vis.com.pk/images/criteria_outlook.pdf

(SO) Rating: A suffix (SO) is added to the ratings of 'structured' securities where the servicing of debt and related obligations is backed by some sort of financial assets and/or credit support from a third party to the transaction. The suffix (SO), abbreviated for 'structured obligation', denotes that the rating has been achieved on grounds of the structure backing the transaction that enhanced the credit quality of the securities and not on the basis of the credit quality of the issuing entity alone.

(blr) Rating: A suffix (blr) is added to the ratings of a particular banking facility obtained by the borrower from a financial institution. The suffix (blr), abbreviated for 'bank loan rating' denotes that the rating is based on the credit quality of the entity and security structure of the facility.

'p' Rating: A 'p' rating is assigned to entities, where the management has not requested a rating, however, agrees to provide informational support. A 'p' rating is shown with a 'p' subscript and is publicly disclosed. It is not modified by a plus (+) or a minus (-) sign which indicates relative standing within a rating category. Outlook is not assigned to these ratings. Refer to our 'Policy for Private Ratings' for details. www.vis.com.pk/images/policy_ratings.pdf

'SD' Rating: An 'SD' rating is assigned when VIS believes that the ratee has selectively defaulted on a specific issue or obligation but it will continue to meet its payment obligations on other issues or obligations in a timely manner.
