## Power Cement Limited (PCL)

### OVERVIEW OF THE INSTITUTION

Power Cement Limited (PCL) was incorporated on December 1<sup>st</sup> 1981 as a private limited company and was later converted into a public limited company on July 9, 1987. PCL is listed on Pakistan Stock Exchange Limited (formerly Karachi and Lahore Stock Exchanges) with the head office situated in Karachi and factory located in DehKaloKohar, Nooriabad Industrial Estate, District Jamshoro (Sindh). The company is engaged in manufacturing, selling and marketing of cement.

PCL is a subsidiary of Arif Habib Corporation Limited (AHCL) which is the holding company of Arif Habib Group. AHCL is majorly involved in making strategic investments in a diversified portfolio of subsidiary companies and associates with exposure in sectors like Fertilizer, Financial Services, Real estate, Construction Materials, Energy and others.

### RATING RATIONALE

Power Cement Limited (PCL) has a 12% market share in terms of installed capacity in the South Zone. Net sales of the company have grown at a CAGR of 9% over the last four years (2012-2016) primarily due to increase in retention prices over the period. Sales mix of the company is dominated by local sales with proportion of local dispatches in total sales having increased given the higher demand and favorable retention prices.

PCL is currently operating with Line 1 and Line 2 and is in the process of adding Line 3. Total rated capacity of Line 1 and Line 2 is 0.9m Tonnes per annum. Efficiency indicators of existing lines compare less favorably vis-à-vis peers with capacity utilization ranging between 51% and 64% over the last four years; lower production is a function of various bottlenecks in existing lines. With the planned addition of Line 3 (7,700 Tonnes per day), rated capacity for cement production is expected to reach around 3.4m Tonnes per annum. Rationale for Line 3 expansion includes catering to increasing demand, enhancing market share and improved profitability & cash flows given the higher efficiency of Line 3 vis-à-vis existing plants.

**Facility Structure:** Investment cost of Line 3 is estimated at Rs. 25b; around two-thirds of which is being financed through debt (Rs. 16.197b) while the rest of the funding is being raised via equity. Total term of the loan will be 8.5 years (inclusive of grace period of 2.5 years). The expansion is expected to go live in June-2019 with repayment of principal commencing from June-2020. Structural features of the Project Finance debt facility include:

- **Project Cost Overrun Support:** Corporate and Personal guarantees of key sponsors for funding cost overruns during construction, upon first demand from lenders. The project cost overrun support shall be uncapped.
- **Debt Payment Shortfall Support:** Available for the first 2 years of expanded plant's operations, for the local currency portion (three-fourths of the facility amount) of the total facility. The remaining foreign currency portion (25%) of the facility will be guaranteed for the entire debt tenor.
- **Devaluation & Contingency Buffer** to the tune of Rs. 1.9b is incorporated in the project cost.
- Formation of a **Debt Payment Account (DPA)** such that the balance in the DPA will be equal to the total semi-annual debt installment seven days prior to each due date. Moreover, sponsors will have the option to provide an SBLC, as an alternate risk mitigating item for the Lenders, if required.

#### Key Rating Drivers

- **Strong Sponsor Profile & Facility Structure:** The assigned rating to PCL is underpinned by financial profile and demonstrated support of parent entity and sponsor family. The support is reflected in interest-free loan provided by sponsors in the past and project cost overrun support and debt payment shortfall support provided for line 3 expansion. JCR-VIS anticipates support from sponsors for PCL if needed, as has already been demonstrated in the past. Rating also incorporates structural features of the debt facility which are expected to mitigate time & cost overrun and devaluation risk.
- **Industry Dynamics:** Local dispatches have witnessed healthy growth over the last two years. Higher growth in local industry dispatches has been partly offset by decline in exports resulting in lower than anticipated industry growth during 11MFY17. The growing cement demand in Pakistan is expected to gain momentum with the advent of China Pakistan Economic Corridor and its corollary projects. Accordingly, planned capacity expansion in the South zone is expected to double its existing capacity, going forward. Additional capacities may pose a risk but industry players anticipate growth in domestic demand to largely absorb additional capacities over time.
- **Market Position:** Ratings are underpinned by company's existing market position (lower market share, efficiency and gross margins) and brand strength which currently compares less favorably to peers. However, the same is expected to improve with completion of planned expansion. Ability of existing operations for even partly supporting planned expansion is limited.
- **Improving Financial Profile:** Financial profile of the company has witnessed improvement as evident from improving cash flows and declining leverage indicators (increase in equity base and lower debt levels).
- **Debt Servicing Coverage:** With the completion of line 3, dispatches and gross margins are projected to increase significantly. Debt servicing is projected to remain adequate under realistic stress test scenarios. Key risk to timely debt servicing includes lower than projected growth in demand resulting in greater than anticipated competition leading to lower margins in the industry.

ISSUE/ISSUER RATING SCALE & DEFINITIONS

Appendix III

Medium to Long-Term

**AAA**

Highest credit quality; the risk factors are negligible, being only slightly more than for risk-free Government of Pakistan's debt.

**AA+, AA, AA-**

High credit quality; Protection factors are strong. Risk is modest but may vary slightly from time to time because of economic conditions.

**A+, A, A-**

Good credit quality; Protection factors are adequate. Risk factors may vary with possible changes in the economy.

**BBB+, BBB, BBB-**

Adequate credit quality; Protection factors are reasonable and sufficient. Risk factors are considered variable if changes occur in the economy.

**BB+, BB, BB-**

Obligations deemed likely to be met. Protection factors are capable of weakening if changes occur in the economy. Overall quality may move up or down frequently within this category.

**B+, B, B-**

Obligations deemed less likely to be met. Protection factors are capable of fluctuating widely if changes occur in the economy. Overall quality may move up or down frequently within this category or into higher or lower rating grade.

**CCC**

Considerable uncertainty exists towards meeting the obligations. Protection factors are scarce and risk may be substantial.

**CC**

A high default risk

**C**

A very high default risk

**D**

Defaulted obligations

**Rating Watch:** JCR-VIS places entities and issues on 'Rating Watch' when it deems that there are conditions present that necessitate re-evaluation of the assigned rating(s). Refer to our 'Criteria for Rating Watch' for details. [www.jcrvis.com.pk/images/criteria\\_watch.pdf](http://www.jcrvis.com.pk/images/criteria_watch.pdf)

**Rating Outlooks:** The three outlooks 'Positive', 'Stable' and 'Negative' qualify the potential direction of the assigned rating(s). An outlook is not necessarily a precursor of a rating change. Refer to our 'Criteria for Rating Outlook' for details. [www.jcrvis.com.pk/images/criteria\\_outlook.pdf](http://www.jcrvis.com.pk/images/criteria_outlook.pdf)

**(SO) Rating:** A suffix (SO) is added to the ratings of 'structured' securities where the servicing of debt and related obligations is backed by some sort of financial assets and/or credit support from a third party to the transaction. The suffix (SO), abbreviated for 'structured obligation', denotes that the rating has been achieved on grounds of the structure backing the transaction that enhanced the credit quality of the securities

Short-Term

**A-1+**

Highest certainty of timely payment; Short-term liquidity, including internal operating factors and /or access to alternative sources of funds, is outstanding and safety is just below risk free Government of Pakistan's short-term obligations.

**A-1**

High certainty of timely payment; Liquidity factors are excellent and supported by good fundamental protection factors. Risk factors are minor.

**A-2**

Good certainty of timely payment. Liquidity factors and company fundamentals are sound. Access to capital markets is good. Risk factors are small.

**A-3**

Satisfactory liquidity and other protection factors qualify entities / issues as to investment grade. Risk factors are larger and subject to more variation. Nevertheless, timely payment is expected.

**B**

Speculative investment characteristics; Liquidity may not be sufficient to ensure timely payment of obligations.

**C**

Capacity for timely payment of obligations is doubtful.

and not on the basis of the credit quality of the issuing entity alone.

**'p' Rating:** A 'p' rating is assigned to entities, where the management has not requested a rating, however, agrees to provide informational support. A 'p' rating is shown with a 'p' subscript and is publicly disclosed. It is not modified by a plus (+) or a minus (-) sign which indicates relative standing within a rating category. Outlook is not assigned to these ratings. Refer to our 'Policy for Private Ratings' for details. [www.jcrvis.com.pk/images/policy\\_ratings.pdf](http://www.jcrvis.com.pk/images/policy_ratings.pdf)

**'SD' Rating:** An 'SD' rating is assigned when JCR-VIS believes that the ratee has selectively defaulted on a specific issue or obligation but it will continue to meet its payment obligations on other issues or obligations in a timely manner.
