## **Summit Bank Limited (SBL)**

# OVERVIEW OF THE INSTITUTION

### **RATING RATIONALE**

SBL is incorporated in Pakistan as a public limited bank. The bank's head office is in Karachi and majority shareholding is vested with Suroor Investments Limited, a company incorporated in Mauritius. The bank operates with a network of 193 branches. Islamic banking footprint was enhanced to 49 branches (including 14 Islamic banking branches and 35 Islamic banking windows) during the outgoing year.

### Profile of the Chairman

Mr. Nasser Abdulla Hussain
Lootah is the Chairman of the
Board of Directors. He is the
Chairman & founder of Nasser
Abdulla Lootah Group
(NALG) setup since 45 years in
UAE. Mr. Lootah is also Patron
of the Australian Business
Council − Dubai.

Summit Bank Limited (SBL) and another commercial bank have decided to consider the potential merger of the two institutions, subject to approval of State Bank of Pakistan and applicable corporate and regulatory compliances. The regulatory short fall in capital requirements is expected to be resolved with the planned merger. During 2017, after the completion of due diligence exercise, both the banks had agreed to a swap ratio. However, due to non-completion of the proposed merger by December 31, 2017, a new swap ratio based on the financials of Dec'2017 was determined. The swap ratio was revised from 1:4.17 to 1:8.37 and has been approved by Board of Directors and Shareholders of Summit Bank. The completion of the merger is subject to obtaining all necessary regulatory approvals and compliance and permission of the Honorable Supreme Court of Pakistan. In view of pending merger, last published financial statements for the Bank are for the period ended-March'2018.

### Rating Rationale

Financial profile of the Bank is weakening as evident from significant deterioration in capitalization profile, persistent trend in operating losses, attrition in deposit base and weak asset quality indicators. A continuation of this trend will result in further downward pressure on the assigned ratings. Weakening in key risk indicators is also evident from lock-in-clause being invoked on outstanding TFC to avoid further deterioration in financial profile. A revised maturity date with all other terms and condition remaining the same has been approved by TFC holders representing not less than 51% of the total voting rights.

### **Rating Drivers**

**Sponsor Support:** The assigned ratings incorporate firm commitment of the sponsor (Suroor Investments Limited) to provide required amount of capital for complying with applicable regulatory requirements on or before 31st December 2018 in case the Board of Directors decide not to pursue the merger option. Ratings draw comfort from demonstrated track record of the sponsor in this regard. However, in case of non-compliance with regulatory requirements beyond December 2018, ratings may face downward pressure.

Capitalization: Capitalization indicators of the Bank have depicted weakening on a timeline basis. Paid-up-capital (net of losses) of the bank amounted to Rs. 9.09b (2017: 9.39b; 2016: Rs. 10.41b) at end-1Q18. Decline in equity base was on account of loss incurred during 2017 and 1Q18 while Tier-1 capital was lower due to higher reduction of deferred tax asset (DTA) (expiry of regulatory relaxation and increase in deduction of DTAs from Tier 1 capital as per SBP Basel 3 regulations). Tier-1 and overall CAR were below regulatory requirement at 3.73% (2017: 4.13%; 2016: 8.01%) and 4.64% (2017: 5.01%; 2016: 10.1%), respectively, at end-1Q18. Moreover, leverage ratio was 1.67% vis-à-vis regulatory requirement of 3%. Weakening in capitalization indicators is evident from increase in net-NPLs to Tier-1 equity which was reported at 86% (2017: 60.6%; 2016: 26%) at end-1Q18. Management is targeting recoveries from NPLs, gain from sale of a portion of the property held on balance sheet and equity injection by the sponsor in case the board decides not to pursue the merger option, to support capitalization levels.

Technical Partner - IIRA, Bahrain | JV Partner - CRISL, Bangladesh

**Liquidity**: Deposit base has witnessed sizeable attrition in the ongoing year but has been adequately managed by the Bank. Proportion of current accounts in deposit mix was reported at 33% at end-1Q18. At end-March'2018, Liquidity Coverage Ratio was reported at 113.76% vis-à-vis regulatory requirement of 90% while Net Stability Funding ratio was reported at 120% vis-à-vis regulatory requirement of 100%. Given the delay in merger, improving liquidity profile will be an important rating driver.

Asset Quality: Corporate segment comprises the major portion of the bank's lending portfolio. Largest sectoral exposures are to the textile and sugar sectors with lending primarily to mid-tier corporates. Credit risk emanating from the financing portfolio is sizeable as evident from net infection of 4.5% at end-1Q18. The Bank has availed Forced Sale Value (FSV) against collateral translating into a provision benefit of Rs. 2.6 billion at end-1Q18. Management intends to minimize the provisioning expense, arising on account of FSV withdrawal and provisions in lieu of fresh classification, through recoveries from existing non-performing clients.

**Profitability:** While trend in operating losses has persisted, quantum of the same has declined on a timeline basis on the back of volumetric growth in earning assets, decline in cost of deposits and increase in foreign exchange income. Lower overall provisioning charges translated into a significant reduction in loss before tax to Rs. 762.8m (2016: loss before tax of Rs. 1.9b). Operating losses declined to Rs. 169m (1Q17: Rs. 273m) during 1Q18 due to lower administrative expenses and higher net interest income. Future quantum of operating losses will continue to be tracked by JCR-VIS.

## **ISSUE/ISSUER RATING SCALE & DEFINITIONS**

## **Appendix II**

### Medium to Long-Term

#### AAA

Highest credit quality; the risk factors are negligible, being only slightly more than for risk-free Government of Pakistan's debt.

#### AA+, AA, AA

High credit quality; Protection factors are strong. Risk is modest but may vary slightly from time to time because of economic conditions.

#### A+, A, A

Good credit quality; Protection factors are adequate. Risk factors may vary with possible changes in the economy.

### BBB+, BBB, BBB-

Adequate credit quality; Protection factors are reasonable and sufficient. Risk factors are considered variable if changes occur in the economy.

#### BB+, BB, BB-

Obligations deemed likely to be met. Protection factors are capable of weakening if changes occur in the economy. Overall quality may move up or down frequently within this category.

#### B+, B, B-

Obligations deemed less likely to be met. Protection factors are capable of fluctuating widely if changes occur in the economy. Overall quality may move up or down frequently within this category or into higher or lower rating grade.

#### ccc

Considerable uncertainty exists towards meeting the obligations. Protection factors are scarce and risk may be substantial.

#### cc

A high default risk

C

A very high default risk

D

Defaulted obligations

#### Short-Term

#### A-1+

Highest certainty of timely payment; Short-term liquidity, including internal operating factors and /or access to alternative sources of funds, is outstanding and safety is just below risk free Government of Pakistan's short-term obligations.

#### A-1

High certainty of timely payment; Liquidity factors are excellent and supported by good fundamental protection factors. Risk factors are minor.

#### Δ-2

Good certainty of timely payment. Liquidity factors and company fundamentals are sound. Access to capital markets is good. Risk factors are small.

#### A-3

Satisfactory liquidity and other protection factors qualify entities / issues as to investment grade. Risk factors are larger and subject to more variation. Nevertheless, timely payment is expected.

#### В

Speculative investment characteristics; Liquidity may not be sufficient to ensure timely payment of obligations.

C

Capacity for timely payment of obligations is doubtful.

Rating Watch: JCR-VIS places entities and issues on 'Rating Watch' when it deems that there are conditions present that necessitate re-evaluation of the assigned rating(s). Refer to our 'Criteria for Rating Watch' for details. www.jcrvis.com.pk/images/criteria\_watch.pdf

Rating Outlooks: The three outlooks 'Positive', 'Stable' and 'Negative' qualify the potential direction of the assigned rating(s). An outlook is not necessarily a precursor of a rating change. Refer to our 'Criteria for Rating Outlook' for details. www.jcrvis.com.pk/images/criteria\_outlook.pdf

(SO) Rating: A suffix (SO) is added to the ratings of 'structured' securities where the servicing of debt and related obligations is backed by some sort of financial assets and/or credit support from a third party to the transaction. The suffix (SO), abbreviated for 'structured obligation', denotes that the rating has been achieved on grounds of the structure backing the transaction that enhanced the credit quality of the securities

and not on the basis of the credit quality of the issuing entity alone.

'p' Rating: A 'p' rating is assigned to entities, where the management has not requested a rating, however, agrees to provide informational support. A 'p' rating is shown with a 'p' subscript and is publicly disclosed. It is not modified by a plus (+) or a minus (-) sign which indicates relative standing within a rating category. Outlook is not assigned to these ratings. Refer to our 'Policy for Private Ratings' for details. www.jcrvis.com. pk/images/policy\_ratings.pdf

'SD' Rating: An 'SD' rating is assigned when JCR-VIS believes that the ratee has selectively defaulted on a specific issue or obligation but it will continue to meet its payment obligations on other issues or obligations in a timely manner. JCR-VIS Credit Rating Company Limited
