The revision in rating outlook reflects prevailing uncertainty in textile sector dynamics due to coronavirus outbreak, prolonged lockdown, overall contraction in demand and challenging economic environment. It is expected that the entire value chain of the textile industry will be effected by these developments. Status of the assigned rating is therefore uncertain as an event of deviation from expected trend has occurred; additional information will be necessary to take any further rating action, warranting a 'Rating Watch-Developing' status. Given that company has largely stable financial risk profile, it is expected that ratings will remain stable post-recovery of the ongoing situation; nevertheless as scenario is evolving rapidly, VIS will closely monitor and will accordingly take action to resolve the outlook
