RATING RATIONALE

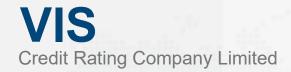

At-Tahur Limited ('PREMA' or 'the Company') is a public listed company, engaged in the production and sale of dairy and associated products. While industry risk was elevated amidst imposition of taxes on food products, the Company's national presence, characterized by its PREMA branded dairy product line, experience of sponsors alongside a sizable livestock size, mitigate business risk.

Topline remained stable in FY24 as higher prices offset lower volumes and decrease in gains from livestock valuation. In 9MFY25, net revenue stabilized on account of favorable pricing adjustments and stable volumes. While gross margins contracted in FY24 and 9MFY25 due to increased procurement costs and income taxes, net margin recovered in 9MFY25 driven by reduced financial charges. Debt servicing remained sustainable in FY24 due to strong cash flow generation, and liquidity and capitalization ratios were maintained at adequate levels. However, lower cash flows in 9MFY25 impacted debt servicing. Increased reliance on short-term borrowings for working capital needs, led to higher capitalization indicators by end-9MFY25.

Going forward, sustained growth in dairy products and stronger profit margins, and achieving projected debt service coverage ratios and capitalization indicators, will be important ratings drivers.

COMPANY PROFILE

PREMA, incorporated in 2007, commenced its farming operations in 2008. The Company introduced its brand 'Prema' in the market in 2009, launching premium quality pasteurized milk, and subsequently launched other products such as whole

milk, low-fat milk, ranges of yogurt, laban & flavored milk, butter, cheese, etc. The management introduced new products, including desi ghee in the dairy-products range and ice tea (Peach), mango nectar in the non-dairy range, and eggs and honey. The management plans to initiate exports of premium quality products primarily to the European market. These strategic initiatives would enable the Company to cater to a broader consumer base.

GOVERNANCE

The Board of Directors (BoD) comprised 7 members, including the CEO, 5 independent directors and 1 non-executive director. A female member is also present on the board as an independent director. The BoD is chaired by Mr. Ijaz Nisar while the CEO is Mr. Rasikh Elahi. Meetings are convened on a quarterly basis. The Board was elected in October 2022 and out of the 7 directors, 3 have completed the Director's training program. For effective oversight, the board has formed two committees namely Audit Committee and HR & Remuneration Committee with three members each. The Company continues to engage Riaz Ahmad & Co. Chartered Accountants as external auditors which belong to category 'A' on the approved list of auditors published by the State Bank of Pakistan (SBP).

INDUSTRY PROFILE & BUSINESS RISK

VIS considers the business risk profile of the packaged milk industry in Pakistan to be medium. The industry faces intense competition, albeit a significant growth opportunity exists due to the untapped loose milk market. During FY22 to FY24, milk production in Pakistan increased from approximately 65.7m MT to 70.1m MT, reflecting a CAGR of about 7.8%, with 80.5% deemed fit for human consumption in FY24.

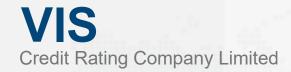

Fresh milk prices rose significantly, averaging Rs. 185.0/liter in FY24, a 21.6% YoY increase, while powdered milk prices jumped to Rs. 820.2 for 390g, up 28.0% YoY. As per SBP trade data, dairy imports surged to Rs. 31.6b (FY23: Rs. 27.3b) in FY24, a 15.7% increase, this is in alignment with expansion in skimmed milk market used largely for confectionary, sweets and flavored drinks. In FY24, Pakistan's dairy exports, including milk, cream, butter, and curd, were nominal, placed at approximately Rs. 1.9b (FY23: Rs. 2.3b) reflecting an increase of 76.9%. The fresh milk supply sector is largely informal, with smallholder farms lacking modern technology, impacting both domestic supply and export capacity.

Major players include:

Public listed companies: Friesland Campina Engro Pakistan (Olper's), Nestle Pakistan (Milkpak), Fauji Foods Limited (Nurpur), At-Tahur Limited (PREMA)

Private limited or public unlisted companies: Haleeb Foods Limited (Haleeb), Adams Milk Foods (Adams), Dairyland (Private) Limited (Dayfresh), Millac Foods (Private) Limited, Shakargani Foods (Private) Limited

During 2024, industry participants were faced with subdued demand due to imposition of a sales tax on dairy products. However, the PDA (Pakistan Dairy

Association) and the government mutually agreed discussing the negative impact on sales volumes in the ongoing year with stakeholders and representatives from various bodies while maintaining focus on enhancing exports. The diversification of product portfolios into non-liquid products has contributed to strong revenue generation for some companies. Therefore, increased sales volumes alongside reduced inflationary pressures and market rationalization will remain key factors impacting business risk in the dairy segment along with supply side challenges in collection, acceptance of packaged milk and door step delivery of fresh milk.

Product Profile & Capacity

The livestock comprising mature and immature comprises heifers/calves, bulls and milking cows, not only used in milking season but also contributes as fair value gains. During FY24, a reduction in production volumes across product portfolio, excluding cream cheese and butter, due to subdued customer demand amidst high inflationary pressure, resulted in lower capacity utilization. Liquid product capacity utilization slightly decreased to 57.2% (FY23: 60.3%), while non-liquid product utilization increased to 20.3% (FY23: 15.5%) in FY24. In 9MFY25, capacity utilization of liquid products and non-liquid products stood at 56.1% and 19.4% respectively.

FINANCIAL RISK

Capital Structure

Capitalization structure remained intact as gearing & leverage ratios improved modestly in FY24. The equity base increased to Rs. 5.17b (FY23: Rs. 4.80b), supported by profit retention. Gearing stood at 0.20x (FY23: 0.26x, FY22: 0.35x) and leverage at 0.47x (FY23: 0.52x; FY22: 0.55x) on account of decrease in total debt.

Gearing ratio and leverage increased slightly to 0.30x and 0.51x, driven by sharp increase in short-term debt at end-9MFY25 on account of higher working capital requirements. Lowering capitalization ratios will bode for the assigned ratings.

Profitability

The Company's sales volumes recorded a marginal decline of 2.1% in FY24 with the growth in raw milk offset by decline in offtake of processed milk and other products (cheese, laban, fruit juice and yogurt). However, the Company achieved a 19.3% growth in net sales from dairy products, totaling Rs. 5.8b (FY23: Rs. 4.9b), driven by price adjustments. The increase in total revenue was only 3.6% (FY24: Rs. 10.6b, FY23: Rs. 10.2b) in FY24, as higher sales of milk were countered by decline in net gains from livestock valuation.

During the review period, sales of milk products contributed an average of 52% to net revenue, with net gains at time of milking accounting for 35% and livestock valuation making up the remaining 13%. Sales mix in terms of products was largely similar in FY24 compared to FY23. In 9MFY25, contribution of processed milk and yogurt sales was higher in comparison to previous years, mainly due to decline in sales of raw milk.

Product wise Sales mix						
	FY23		FY24		9MFY25	
Raw milk	959.0	19.6%	1,334.4	22.8%	557.4	13.6%
Processed milk	2,820.5	57.6%	3,302.4	56.5%	2,425.8	59.1%
Yogurt	637.8	13.0%	773.4	13.2%	774.3	18.8%
Others (cheese, butter etc.)	482.4	9.8%	435.3	7.4%	350.2	8.5%
Total	4,899.7	100%	5,845.4	100%	4,107.8	100%

Gross margin contracted 22.8% (FY23: 28.0%) in FY24 as a result of elevated packaging costs. Operating expenses increased by 10% (FY24: Rs. 1.6b, FY23: Rs. 1.4b), reflecting inflationary pressures, while finance costs rose to Rs. 283m (FY23: Rs. 226m) due to high interest rates in FY24. Consequently, net income declined to Rs. 353.0m in FY24 (FY23: Rs. 1.2b).

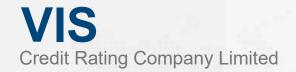

For 9MFY25, net revenue was mostly unchanged at Rs. 7.65b (9MFY24: Rs. 7.77b) with a slightly lower gross margin of 21.1% (9MFY24: 22.8%). Net profit stood at Rs. 343m (9MFY24: Rs. 236m), primarily due to reduced finance costs and higher other income, improving the net margin to 4.5% (9MFY24: 3.0%) in 9MFY25. Overall profitability profile of the Company has posted some improvement in ongoing year when compared to FY24, however, the same remained lower than FY23.

The Company anticipates sales from dairy products to increase on the back of recovery in demand while net profit is expected to rise, driven by healthy gross margin and continued decline in financial charges.

Debt Coverage & Liquidity

Despite the decrease in profitability, funds from operations (FFO) increased to Rs. 539m (FY23: Rs. 39m), primarily due to surge in non-cash adjustments, driven by lower gains arising from changes in fair value and loss on sale of dairy livestock. This resulted in a marked improvement in FFO to long-term debt and FFO to total debt, which stood at 82% (FY23: 5%; FY22: 28%) and 52% (FY23: 3%; FY22: 18%) respectively. FFO to long-term debt and FFO to total debt dropped significantly, primarily attributed to lower cash generation during the period. Similarly, debt service coverage ratio (DSCR) increased to 1.38x (FY23: 0.48x, FY22: 1.04x), reflecting higher FFO. During 9MFY25, DSCR decreased to 1.06x, primarily driven by lower cash generation.

On the liquidity front, current ratio has shown improvement to 0.91x (end-FY23: 0.77x, FY22: 0.84x) by end-FY24 on account of decrease in short-term debt. Current ratio increased to 1.02x by end-9MFY25, reflecting impact of lower trade payables. Moreover, liquidity comfort is derived from Rs. 4.19b (June 2024: Rs. 4.14b, June 2023: Rs. 3.99b) in biological assets as of March 2025, which, while classified as non-current under IAS 41, are marketable in nature and could provide an additional buffer, if needed. Notable improvement in debt coverage profile and liquidity metrics is not anticipated in the coming year.
