

# Rating Transitions & Cumulative Default Rates - **2023**

---

**VIS** Credit Rating Company Limited

## DETAILS OF DATA SETS

- Rating Transition & Cumulative Default Rate Study, updated at the beginning of each calendar year, uses data from VIS rating database;
- Rating Transition and Cumulative Default Rate Study are based on last 10 Static Pools that include ratings conducted from January 1, 2012 to December 31, 2023;
- Only ‘Medium to Long term’ ratings on VIS’ Issue/Issuer Rating Scale are used;
- Ratings at Issuer level are used; In case of multiple instrument ratings by an issuer, long term instrument rating taken as the issuer’s rating. In case of subordinated or other structures, rating of the senior most debt is taken.
- Ratings of Structured Obligations and Insurer Financial Strength (IFS) ratings are not included in both studies due to limited number and non-comparability respectively;
- Cumulative Transition and Default Rates are expressed in Percentage Terms
- The above methodology is consistent with the methodology proposed to be implemented at the level of ACRAA.

## RATING TRANSITIONS DEFINITION

- Rating Transitions are calculated for Periods: 1 year, 2 years, 3 years and 5 years since Jan. 1, 2012;
- Rating Transitions are calculated for All Rating Categories including Modifier Levels (+/-);
- Groups of all Outstanding Ratings at the Beginning of Each Period are formed;
- These Groups are called Static Pools or Cohorts;
- Rating Transitions Matrix for Each Period is developed using Static Pool Method;
- Ratings at the Beginning-of-the-period are displayed on the Y (Vertical) Axis of the Matrix;
- An Accumulated Migration Percentage of Rating Category at the End-of-the-period is depicted on the X (Horizontal) Axis;

- Failure of an obligor to make timely payment of principal and/or interest under contractual terms of any financial obligation.
- A distressed restructuring whereby
  - lenders have diminished financial returns relative to the original obligation; and
  - the restructuring has the effect of allowing the obligor to avoid a bankruptcy or payment default.

Default is generally recognized after the expiry of grace period. However, if VIS believes that the requisite payment will not be made in full by the due date (including the pre-specified grace period), then default may be recognized immediately.

## DEFINITION OF DEFAULT

## DETAILS OF CDR STATIC POOLS

- Groups of all Outstanding Ratings at the Beginning of Each Period are formed;
- These Groups are called Static Pools or Cohorts;
- Changes in a particular Static Pool are then Tracked till the End-of-the-period;
- Adjustment for Withdrawn or Discontinued Ratings: All such ratings which do not continue to Exist till the End-of-the-period are Excluded at the time of Static Pool Formation;
- New ratings that are conducted during the period of a Static Pool are included in Static Pools of subsequent Periods;
- Insurer Financial Strength (IFS) Ratings, though use similar nomenclature, are not included due to difference in definition as compared to regular rating scale.

## CUMULATIVE DEFAULT RATES

- Three-years Weighted Average Cumulative Default Rates (CDRs) are calculated using Static Pools of 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020 and 2021;
- CDRs are calculated at Category level and not on modifier level due to non-existence of critical mass;
- Calculation Steps e.g. 3-years CDRs:
  - Create Withdrawal-adjusted Static Pools and Survivor Rate for each Period
  - Calculate Marginal Default Rates (MDRs) for each Period for every Static Pool separately;
  - Calculate Weighted Average of each MDR (wMDR) weighted for Size of each Static Pool
  - Calculate CDR =  $1 - [(1-WMDR1)*(1-WMDR2)*(1-WMDR3)]$
